

Hepatitis B Virus (HBV) Infection and Re-activation During Nucleos(t)ide Reverse Transcriptase Inhibitor–Sparing Antiretroviral Therapy in a High–HBV Endemicity Setting

Adam Abdullahi, Olga Mafotsing Fopoussi, Judith Torimiro, Mark Atkins, Charles Kouanfack, and Anna Maria Geretti

The sentence: “Patients eligible to enter MANET were established on 2 NRTIs plus a PI/b for ≥ 12 months and showed a CD4 count > 200 cells/mm³ and a plasma HIV-1 RNA load.” should read: “Patients eligible to enter MANET were established on 2 NRTIs plus a PI/b for ≥ 12 weeks and showed a CD4 count > 100 cells/mm³ and a plasma HIV-1 RNA load.” This has been updated in the original article.
